Subject: Microsoft Settlement

To the Department of Justice,

The Federal Government and nine states along with Microsoft Corporation have agreed to terms of a settlement. Shouldn't we honor that? With the current turmoil in our country, let us ask, "What serves our nation best, both socially and economically?" It seems to me that upholding the proposed and agreed upon settlement is in the best interest of our country and people.

What is really to be gained by dragging this case on for months or years. So if you value any input from thoughts of an ordinary citizen of our country, "Let's move on! " Nine states and The Department of Justice and Microsoft have agreed to this proposed settlement. As a teacher, our students know that in a democracy, the majority of votes makes the decision. Aren't we still going by those rules? Let's move on!

Thank you for taking the time to

read my letter,

Gary
